

Residential plumbing plan review requirement for building departments within Franklin County Public Health

Beginning February 9, 2026, all residential and commercial plumbing permit applications must include the Franklin County Public Health plan review approval notice. The fixture count on the application must match the fixture count on the approval notice.

Ohio Revised Code 3781.03(C) authorizes FCPH to enforce the Ohio Plumbing Code and applicable rules of the Ohio Board of Building Standards in townships, villages and building departments that retain FCPH for that purpose.

Customers need to register on the Franklin County Public Health portal to submit plan review applications or other forms of business with their Agency:
